

Portuguese Water Resources Association

Main Objectives

- a) to further progress the knowledge of water resources, namely in the fields of water management, planning, development, administration, science, technology, research and education;
- b) to promote and support the co-operation of interested individuals and entities in creating a suitable institutional framework for solving national water resources problems;
- c) to support and participate in the dissemination of the concept and implementation of suitable policies for water resources management in Portugal;
- d) to collaborate with related foreign organisations and to promote Portuguese participation in international water resources programmes.

Main Activities

- a) organisation of national and international technical meetings, seminars and workshops on water resources and related topics;
- b) to support programmes on education and training as well as on scientific and technological up-dating;
- c) publication of a scientific journal and a newsletter;
- d) representation at advisory or decision-making committees formed by the initiative of public or private entities at the request of these entities;
- e) incentivate specialised committees to analyse debatable issues and problems within the scope of their activity;
- f) to support Portuguese Committees of International Associations whose objectives are similar to those of the Portuguese Water Resources Association, namely the National Committee of IWRA - International Water Resources Association.
