

# Monitoring and evaluation of nature-based solutions – thinking outside the box –

**Tuesday, 3 May 2022, 15:00 CEST**

Please register here: <https://project-merlin.eu/academy.html>

# MERLIN

**free webinar**

This webinar will describe how monitoring and evaluation (M&E) is essential to enable adaptive management of initiatives such as nature-based solutions (NbS). We will explore why various aspects of socio-ecological systems need to be understood in order to fully and fairly appraise NbS, and briefly compare this to current M&E practices. We will conclude by considering what M&E changes might be needed to fully unlock the potential of NbS.

**Kerry Waylen**

Group leader “Environmental Governance & Land Management”  
Social, Economic and Geographical Sciences Department  
**James Hutton Institute**
